

Amal Duriseti

1890 Oak Knoll Ln., Menlo Park, CA 94025 | (650) 270-1955 | aduriseti@gmail.com

EDUCATION

University of California Los Angeles

Expected June 2017

- Major: Computer Science and Engineering, Minor: Mathematics
- GPA – 3.62

National Society of Collegiate Scholars

2014-2015

- Invite extended to less than 10% of students, based on GPA

TECHNICAL SKILLS

Languages

- C++, Python, C#, Java, Javascript, Matlab, HTML, CSS, UNIX/shell scripts, TeX, English

Libraries/Toolboxes

- VTK, OpenCV, NumPy, Canon SDK, Android SDK, Node.js, various Matlab toolboxes

Configuration and DevOps tools

- Apache, Nginx, Docker, Chef, Vagrant, Django, Express

Non CS Skills

- SolidWorks, G-code

WORK EXPERIENCE

Mr. Key

2015

- Designed and implemented an image processing algorithm that extracted the bitting code from an image of a key
- Deployed code to a server hosted by AWS

UCLA Applied Math REU

2015

- Automated microscope operation and data analysis using image processing
- Specific functionality implemented included autofocus, automatic registration, and feature recognition

Uncovr

Summer 2014

- Developed and coded a company website using AJAX design principles
- Wrote Python scripts to retrieve data from online video platforms and store it in a MySQL database
- Used AWS to host and configure a server, MySQL database, webpage

Viditure

Summer 2014

- Helped create a API/library for PDF and JPEG conversion and manipulation
- Helped develop an Andriod version of the company's web app using the Android SDK

Tesla Motors, Palo Alto, CA

Summer 2012

- Wrote code that organized and analyzed resistance and voltage data collected from batteries charged, discharged, and/or stored at various temperatures
- Designed and prototyped an alternative temperature regulating housing for testing batteries

Stanford University, Palo Alto, CA

Summer 2011

- Researched how coupled atmospheric-oceanic general circulation models may be used to investigate how climate change may affect jet stream patterns
- Summarized the findings of existing literature in a variety of topics for my professor and his graduate students

ENGINEERING PROJECTS

Hackathons: LA Hacks, OpenHacks, etc.

2014 – 2015

- Helped create a web application which searched several social media services for a specific query and displayed popular sentiment graphically using the Google Maps API
- Helped design and execute a chrome extension that managed history using existing API's

Robotics, Menlo Atherton High School

2009 – 2013(2015)

- **Programming:** Wrote PID and PID tuning code, wrote a program to aim basketball throws
- **Design:** Responsible for prototyping and computer design of (using SolidWorks) multiple robot components:
- **General Construction:** machining (G-code/CNC, lathe, mill, drill press), electronics
